

International Conference on Advances in Radiation Oncology #ICARO2

Wednesday, June 21, 2017

Wednesday morning - Poster Presentations - Screen2 (10:30 AM - 11:00 AM)

-Conveners: Oleg Belyakov

time	[id] title	presenter
10:30 AM	[21] Use of volumetric arc therapy for nodal boosting in cervical cancer radiotherapy.	AKBAROV, Kamal
10:35 AM	[33] Clinical implementation of intracranial stereotactic radiotherapy with non dedicated linear accelerator in a developing country: the cuban experience	CHON RIVAS, Ivonne
10:40 AM	[36] Development of a BNCT facility based on axial Deuterium–Deuterium (D–D) neutron generator using MCNP code	BERGAOUI, kaouther
10:45 AM	[40] Mathematical modeling and optimization of radiation therapy dose-time treatment scheme	MENIAILO, Aleksandr
10:50 AM	[46] Intensity modulated radiotherapy benefits comparing to conventional radiotherapy for locally recurrent nasopharyngeal carcinoma	DAOUD, Hend
10:55 AM	[61] An investigation of partial volumetric arc therapy versus 3D conformal radiation therapy for early stage larynx cancer	KODALOGLU, Nur
