

International Conference on Advances in Radiation Oncology #ICARO2

Wednesday, June 21, 2017

Wednesday morning - Poster Presentations - Screen3 (10:30 AM - 11:00 AM)

-Conveners: Oleg Belyakov

time	[id] title	presenter
10:30 AM	[68] Tunable compact monochromatic X-ray synchrotron radiation source based on inverse compton scattering for advanced radiological applications	ELASHMAWY, Mostafa
10:35 AM	[88] Novel hybrid pixel detector design for the use in continuous on-line dose monitoring in radiotherapy.	NEUE, Gordon
10:40 AM	[102] Characterization of a Cobalt-60 radiotherapy unit upgrade: BEST Theratronics T780C to Equinox100	JOSHI, Chandra
10:45 AM	[124] Standardisation of treatment planning in frameless stereotactic radiosurgery and radiotherapy using volumetric modulated arc therapy (VMAT) beams	GANESH, Tharmarnadar
