

# International Symposium on Uranium Raw Material for the Nuclear Fuel Cycle: Exploration, Mining, Production, Supply and Demand, Economics and Environmental Issues (URAM-2018)

Contribution ID: 153

Type: ORAL

## Mapping the World Distribution of Uranium Deposits

*Wednesday 27 June 2018 16:20 (20 minutes)*

Since the publication of the first edition of the IAEA map - World Distribution of Uranium Deposits - more than 2 decades ago, the knowledge of the distribution of different types of uranium deposits has advanced significantly. This has allowed the creation of a more sophisticated and comprehensive database of world uranium deposits (UDEPO). Increased insights, such as a new deposit-type classification scheme, additional new discoveries as well as disaggregation of previously known discoveries, and enhanced GIS techniques have also allowed the generation of a new second edition map. This will provide a valuable decision-making tool for a wide variety of stakeholders interested in existing and potential new uranium discoveries.

### Country or International Organization

International Atomic Energy Agency

**Primary author:** FAIRCLOUGH, Martin (International Atomic Energy Agency)

**Co-authors:** IRVINE, Jonathan (Geological Survey of South Australia); KATONA, Laz (Geological Survey of South Australia); SLIMMON, William (formerly Saskatchewan Geological Survey)

**Presenter:** FAIRCLOUGH, Martin (International Atomic Energy Agency)

**Session Classification:** Advances in Exploration

**Track Classification:** Track 4. Advances in exploration
