

# International Symposium on Uranium Raw Material for the Nuclear Fuel Cycle: Exploration, Mining, Production, Supply and Demand, Economics and Environmental Issues (URAM-2018)

Contribution ID: 155

Type: ORAL

## Effect of Caustic Soda Fusion Temperature on Malaysian Xenotime

*Thursday, 28 June 2018 17:00 (20 minutes)*

Xenotime is mineral rich in rare earth element (REE), mostly contain phosphate mineral which is a rich with yttrium source. Alkaline fusion method was used to devote the study of the preparation of thorium and rare earth. This method could minimize radioactive waste volume, using diluted acid for dissolution and recover phosphate as by product. The method studied included caustic soda fusion, solid and liquid separation and leaching process. The raw material used was a concentrate containing about 60% to 75% total rare earth oxides, 1 to 2% thorium oxide, and 23 to 26% phosphorus pentoxide. Different ratio of Xenotime mineral and NaOH (1:0; 1:1; 1:2 and 2:1) was studied and undergo fusion at different temperature (400, 500, 600 and 700 °c). The resulting powder was analyzed by X-ray diffraction (XRD), X-ray Fluoresce (XRF), particle size analysis (PSA), Field Emission Scanning Electron Microscope (FESEM), Raman Spectrometry and Simultaneous Thermal Analysis (STA). It is possible to extract almost 90% of thorium, rare earths and phosphate by these processes.

### Country or International Organization

Malaysia

**Primary author:** Dr HAZAN, Roshasnorlyza (MALAYSIAN NUCLEAR AGENCY)

**Co-authors:** Mr ZAHARI, Ahmad Khairulikram (Malaysian Nuclear Agency); Ms KONES, Jacqueline (Malaysian Nuclear Agency); Mrs MOHAMED TAKIP, Khaironie (Malaysian Nuclear Agency); Mr MOHD RUF, Mohd 'Izzat Fahmi (Malaysian Nuclear Agency); Ms AZHAR, Norhazirah (Malaysian Nuclear Agency); Mrs SAPIEE, Nuraqilah (Malaysian Nuclear Agency); Mrs ZAINAL ABIDIN, Siti Salwa (Malaysian Nuclear Agency); Mr PAULUS, Wilfred (Malaysian Nuclear Agency)

**Presenter:** Dr HAZAN, Roshasnorlyza (MALAYSIAN NUCLEAR AGENCY)

**Session Classification:** Thorium and associated resources

**Track Classification:** Track 9. Thorium and associated resources —international and national initiatives
