

Influence of electron cyclotron resonance heating on ion heat conductivity in T-10 plasma

Thursday 25 October 2018 08:30 (20 minutes)

Investigation of ion heat conductivity in plasma with ECR-heating and suppressed saw-teeth and modes $(m, n) = (1, 1)$ and $(2, 1)$ is carried out. Off-axis heating (localization radius is $\rho = r/a \approx 0.5$) and combined heating (on-axis ECRH together with off-axis) are considered. It is shown for the ohmic stage that ion heat conductivity is on a neoclassical level in the central zone $\rho \leq 0.5 - 0.6$ but it is clearly anomalous outside these radii. Off-axis heating does not lead to any notable changes of the heat conductivity profile. In the regime with combined heating additional ≈ 0.5 MW on-axis ECR-power results in ion heat conductivity magnification up to ≈ 1.5 times and ≈ 1 MW on-axis ECR-power causes the increase up to ≈ 2 times.

Country or International Organization

Russian Federation

Paper Number

EX/P5-21

Author: Mr NURGALIEV, Maxim (National Research Centre "Kurchatov Institute")

Co-authors: Mr BORSCHEGOVSKIY, Alexander (NRC "Kurchatov Institute"); Dr KISLOV, Alexander (NRC "Kurchatov Institute"); Dr DNESTROVSKIY, Alexei (Kurchatov Institute); Mr NEMETS, Anton (NRC "Kurchatov Institute"); Mr SARYCHEV, Dmitrii (NRC "Kurchatov Institute"); Mr SERGEEV, Dmitriy (NRC "Kurchatov Institute"); Mr ZEMTSOV, Ivan (NRC "Kurchatov Institute"); Mr KLYUCHNIKOV, Leonid (NRC "Kurchatov Institute"); Mr SOLVEV, Nikita (NRC "Kurchatov Institute"); Mr NAUMENKO, Nikolay (B.I. Stepanov Institute of Physics NASB); Mr TUGARINOV, Sergey (NRC "Kurchatov Institute"); Ms MYLTON, Tatyana (NRC "Kurchatov Institute"); Mr KRUPIN, Vadim (NRC "Kurchatov Institute"); Mr TRUKHIN, Vladimir (NRC "Kurchatov Institute")

Presenter: Mr NURGALIEV, Maxim (National Research Centre "Kurchatov Institute")

Session Classification: P5 Posters
