

# International Symposium on Isotope Hydrology: Advancing the Understanding of Water Cycle Processes CN-271

**Monday 20 May 2019 - Friday 24 May 2019**

**Vienna International Centre**

## **Scientific Programme**

The objectives of the symposium are to:

(a) demonstrate contributions of isotope tracers and other geochemical tools in advancing the understanding of hydrological processes.

(b) demonstrate recent developments in the approaches and analytical methods.

## **Analytical Methods Research and Development**

## **Water Resources Management**

## **Precipitation and Modern Climate**

## **River, Lake and Integrated Watershed Studies**

## **Age Dating and Paleoclimate Studies**

## **Water Balance Modelling and Mapping**

## **Isotopes in Groundwater Chemistry and Water Pollution Research**
