Spent fuel management at Almirante Alvaro Alberto Nuclear Power Center

Thursday, 27 June 2019 16:20 (2 minutes)

This work aims to describe the strategies of management of spent fuel assemblies in the CNAAA power plants adopted as a function of the depletion of the storage capacity of their spent fuel pools. Having chosen the option of dry storage this has the intention to describe the main participants, the Brazilian nuclear policing, the spent fuel storages, the strategy adopted to manage the decrease in storage capacity, the implementation schedule and the current status.
