## **International multi-modal transport of spent nuclear fuel through the example of research reactor spent fuel return programs**

*Friday, 28 June 2019 11:00 (20 minutes)*

The paper describes key engineering and logistical solutions for organization of international shipments of nuclear materials from research reactors. The evolution of transport equipment and routes is generalized, and the issues requiring harmonization of national requirements and procedures for the safe transport of the spent nuclear fuel are identified.
