Overview of regulatory framework on dry cask storage in Japan

Tuesday, 25 June 2019 15:40 (20 minutes)

On March 2019, the regulatory body of Japan, NRA, issued new regulations on dual purpose cask (DPC) for dry storage of spent fuel on the site, along with the licensing process of design certification on DPC. The requirements ensure consistency with those for the interim storage facility off the site and with transport regulations.
