INTERNATIONAL SHIPMENTS OF SENSITIVE NUCLEAR MATERIALS Experience of International Nuclear Services in safe and secure transport of sensitive nuclear materials across international borders

Friday, 28 June 2019 12:00 (20 minutes)

International Nuclear Services (INS) and its majority-owned subsidiary Pacific Nuclear Transport Ltd. (PNTL) have been carrying out transports of different categories of nuclear materials for well over forty years, travelling over five million miles without any nuclear or security incident.

This record has been achieved through significant and sustained investment in the capability of assets, people and systems by INS and its international partners and stakeholders. INS has applied its unique experience in this field to ensure a rigorous and uncompromising approach to regulatory compliance, safety, security, capability and communication.
