

Web-based Streamed Waveform Display using MDSplus events and Node.js

G. Manduchi, G. Moro, A.Luchetta, C. Taliercio, A. Rigoni

Consorzio RFX, Corso Stati Uniti 4, Padova 35127, Italy

A lightweight streaming system for visualization

- Using UDP base **MDSplus events** from data originators

- Using a **Node.js** server for receiving events and servicing Web pages for visualization

- Using **ServerSent Events** to update visualization

- Using **plotly** as plotting JavaScript framework at the client side

- Scalable to a large number of signals
