

International Conference on Fast Reactors and Related Fuel Cycles FR22:
Sustainable Clean Energy for the Future (CN-291)

Contribution ID: 351

Type: ORAL

The Versatile Test Reactor (VTR) Approach to Sodium Fire Hazards Analysis and Protection System Methodology

Wednesday 20 April 2022 15:04 (12 minutes)

Country/Int. organization

United States of America

Author: BUCKNOR, Matthew (Argonne National Laboratory)

Co-authors: SIENICKI, James (Argonne National Laboratory); MOISSEYTSEV, Anton (Argonne National Laboratory)

Presenter: BUCKNOR, Matthew (Argonne National Laboratory)

Session Classification: 2.3 Accident Analysis

Track Classification: Track 2. Fast Reactor Safety
