

International Conference on Fast Reactors and Related Fuel Cycles FR22:
Sustainable Clean Energy for the Future (CN-291)

Contribution ID: 178

Type: ORAL

**The δ -ferrite transformation behavior and
mechanical properties of 316H weld metal during
high temperature service**

Wednesday 20 April 2022 11:28 (12 minutes)

Country/Int. organization

China

Authors: WEI, Shitong; Prof. LU, Shanping (Institute of Metal Research, Chinese Academy of Sciences); Prof. LI, Yiyi (Institute of Metal Research, Chinese Academy of Sciences)

Presenter: WEI, Shitong

Session Classification: 4.2 Structural, Novel, and Large Components Materials

Track Classification: Track 4. Fast Reactor Materials (Coolants, Structures) and Components
