

International Conference on Fast Reactors and Related Fuel Cycles FR22:  
Sustainable Clean Energy for the Future (CN-291)

Contribution ID: 39

Type: ORAL

## Creep and Creep-Fatigue Behavior of an Advanced Stainless Steel (Alloy 709) - Application to Sodium-Cooled Fast Reactors

*Wednesday 20 April 2022 10:40 (12 minutes)*

### Country/Int. organization

Saudi Arabia

**Author:** Dr ALOMARI, Abdullah (King Abdulaziz City for Science and Technology)

**Co-authors:** Prof. MURTY, Korukonda (Department of Nuclear Engineering, North Carolina State University, Raleigh, NC, USA); Dr KUMAR, Nilesh (Metallurgical and Materials Engineering, The University of Alabama, Tuscaloosa, AL, USA); Dr ALSMADI, Zeinab (Department of Nuclear Engineering, North Carolina State University, Raleigh, NC, USA)

**Presenter:** Dr ALOMARI, Abdullah (King Abdulaziz City for Science and Technology)

**Session Classification:** 4.2 Structural, Novel, and Large Components Materials

**Track Classification:** Track 4. Fast Reactor Materials (Coolants, Structures) and Components
