

**IAEA International Conference on Advances in Radiation Oncology
ICARO3**

Virtual Event,
16 to 19 February 2021

BIOGRAPHICAL SUMMARY FOR SPEAKERS

NAME:	Marc Vincent N. Barcelona
AFFILIATION & COUNTRY:	Jose R. Reyes Memorial Medical Center, Department of Radiotherapy, Republic of the Philippines
SESSION #	36
PAPER TITLE:	Induction Chemotherapy Followed By Concurrent Chemoradiotherapy in a 14 Year Old Patient With Poorly Differentiated Nasopharyngeal Carcinoma: A Case Report on the use of the ARAR0331 Protocol
SHORT BACKGROUND FOR INTRODUCTION (2-3 LINES):	A case report of a 14 year old (at the time of treatment) pediatric patient with locally advanced nasopharyngeal carcinoma treated using the ARAR0331 protocol Stratum B consisting of induction chemotherapy (3 cycles of tri-weekly 5-fluorouracil and cisplatin) followed by reduced dose radiation therapy (61.2 Gy in 1.8 Gy/fraction) and tri-weekly concurrent cisplatin as patient was a complete responder on imaging post-induction chemotherapy. Follow-up showed no recurrence or metastasis and only Grade 1 xerostomia up to 3 years post-treatment.

Release of Electronic Contribution
