

International Conference on Safety and Security of Radioactive Sources: Accomplishments and Future Endeavours (CN-295)

Contribution ID: 280

Type: Poster

Stakeholders Awareness Raising Programs on the safety and security of radioactive sources: Challenges and Opportunities A case Review of Ethiopian Radiation Protection Authority stakeholder Communication and Consultation Practices

Thursday, 23 June 2022 16:15 (15 minutes)

I have taken this to be an opportunity for me as I am a communicator in charge of awareness raising programs activities in the Ethiopian Radiation Protection Authority. The research I want to study is very critical in that it adds much to the communication and consultation works the regulatory body undertakes. It is believed that the significance of having informed stakeholders and public and the challenges and opportunities that come through awareness raising campaigns will help design future safety and security measures or radioactive sources. I hope my department in particular will have chances to redesign its communication strategies, tools and identify potential stakeholders for good

Country OR Intl. Organization

Ethiopia Ethiopian Radiation Protection Authority

Primary author: Mr AWOKE TIRUNEH, Awoke (Ethiopian Radiation Protection Authority)

Presenter: Mr AWOKE TIRUNEH, Awoke (Ethiopian Radiation Protection Authority)

Session Classification: Poster Session 3

Track Classification: 24. Raising awareness of industry, civil society, international organizations and other stakeholders about the safety and security of radioactive sources, including sustainability and resilience in unplanned situations (e.g., pandemics and natural disasters)
