

Dr. Iva Bogdanović Radović is working as a Tenured Senior Scientist in the Laboratory for Ion Beam Interactions at the Ruđer Bošković Institute, Zagreb, Croatia. Her research interests during her career are focused on the development and application of various Ion Beam Analysis (IBA) techniques for materials analysis and modification. Last ten years she was mainly working on the application of IBA for fusion related research and the development of the Secondary Ion Mass Spectrometry with MeV ions (MeV SIMS) and its application in biology, forensics and cultural heritage.
