

Dr. Ilaria Carlomagno

Joint PhD (Università Roma Tre and Université Grenoble Alpes) in Physics. After several years focusing on the study of the structural and magnetic properties of thin Co films intercalated under Graphene (IDO3 beamline at the ESRF), I started a PostDoc at the Physics dep. of Università Roma Tre and then moved to XRF beamline of the Elettra Synchrotron in Trieste. There, I have started working on X-rays techniques applied to cultural heritage.
