

**Anastasiya Magazinik** (CERN/Tampere University)

I completed the Master's degree in Togliatti State University in Russia with specialisation in Automation of process and production in automotive sector. From 2009 I am at CERN as a mechanical engineer with the CLIC study team. Starting from 2018 I am enrolled as a Doctoral student in Tampere University in Finland for Business and Technology Management Doctoral programme. Together with the CLIC study I continued to do research for the industrialization of 12 GHz accelerating structures towards the mass production and societal impact assessment of CLIC.
