

Dr. Liangdeng Yu (*Chiang Mai University, Thailand*)

Ph.D. in applied solid state physics (ion beam), Niels Bohr Institute, University of Copenhagen, 1992, more than 30 years working on ion beams and materials, with particular interest in ion beam biology (including molecular biology, genetics, agriculture, medicine, food and health/safety); as Research Scientist, Expert, Assoc. Professor and Senior Research Fellow, successively worked in the laboratory of Plasma and Beam Physics Research Facility, Chiang Mai University and Thailand Center of Excellence in Physics, and currently retired advisor for laboratory projects; participated in a number of IAEA CRP and TC projects, and worked as an IAEA expert as well.
