

Toms Torims holds a doctoral degree in engineering sciences from Riga Technical University (RTU). He is is full professor at RTU and Senior Researcher at the Center of High Energy Physics and Accelerator Technologies, Cooperation Associate and Latvian National Contact point at CERN as well as Chairman of CERN Baltic Group. Prof. Torims is conducting his scientific and research activities as a Scientific Leader of RTU in the I.FAST project, Leader of the HERTIS Collaboration and is supervising number PhD students in the field of the manufacturing engineering and accelerator technologies. He is author of more than 50 scientific articles, co-author of 5 university textbooks and several international patents. Current research interests: advanced manufacturing technologies and in-situ repair technologies, societal applications of the accelerator technologies.
