

**Siti Mohd Janib** is a Senior Researcher at the Medical Technology Division, Malaysian Nuclear Agency. She has extensive research experience in the area of radiopharmaceutical development, molecular imaging and genetic engineering. From 2018 - 2019 she served as the Scientific Attaché at the Permanent Mission of Malaysia to the United Nations in Vienna. She is involved in the Quality Management System for radiopharmaceutical production, to ensure that all products produced at Nuclear Malaysia's facility are safe and up to regulatory standards. In addition, she also serves as an instructor for the Radiation Safety in Nuclear Medicine Course, IAEA Postgraduate Educational Course (PGEC) in Radiation Protection and the Safety of Radiation Sources and other short courses organized by the Malaysian Nuclear Agency. She is currently the Chief Editor for the Journal of Nuclear Technology and Radiation Applications. In addition, she has participated in many outreach programs to promote nuclear science and technology to secondary school and university students.
