

**Dr. Alessandro Maffini** is a Researcher at the Energy Department of Politecnico di Milano, Milano, Italy. He graduated in Nuclear Engineering at Politecnico in 2012 and got a PhD in Nuclear Science and Technology in 2015 at the same Institution. His main research interests are related to the development of advanced materials with laser- and plasma-based techniques and the experimental and theoretical investigation of laser-matter interaction in different regimes, with a focus on the application of laser-driven radiation sources for material & nuclear sciences.
