

**Dr. Elena Stancu** is Scientific Researcher at National Institute for Laser, Plasma and Radiation Physics (INFLPR), Bucharest-Magurele, Romania. She is working in the Secondary Standard Dosimetry Laboratory at High Energies – STARDOOR of the INFLPR. She is Radiation Protection Officer and Technical Manager of the – STARDOOR laboratory of the INFLPR. Also, she is designed Radiation Protection Officer of the High Power Laser CETAL facility of the INFLPR. She is working in the field of radiation beam dosimetry for testing and calibration purposes for high energy range. She has experience on radiation protection and radiation dosimetry for calibration purposes of radiation detection systems used in radiation beam dosimetry, radiation protection dosimetry and dose monitoring using active and passive dosimeters. In CETAL facility she carried out research in the field of interaction of ionizing radiation with matter; research in the field of accelerated electron irradiation; radiation dosimetry generated by the interaction of the laser beam with the target in extreme conditions - pulse duration of the order of femtoseconds and high intensity laser beam. Graduated from Novosibirsk State University (Novosibirsk, Russia), received PhD in Budker Institute of Nuclear Physics (Novosibirsk, Russia). Moved to United States in 2001 and work at LSU CAMD Synchrotron storage ring as Accelerator physicist. From 2006 till present is working at Brookhaven National Laboratory as Accelerator Physicist first at NSLS X-ray ring and then at Accelerator Test Facility.
