

Germán Rabi is specialist on Radiation Protection and Safety of Radiation Sources. Rabi has been working for the Nuclear Regulatory Authority of Argentina in the safety control of radiopharmaceutical production facilities with cyclotrons for 11 years. Since 2017 is the head of "Class I Particles Accelerators Control Sector". Since 2021, Rabi is also the head of the 'Licensing Project of the Argentine Center of Proton Therapy'. He has participated as an expert of the IAEA on radiation safety missions about cyclotron-radiopharmacy facilities and he has also worked on the development of the TecDoc on "Authorization and Inspection Processes on Radiopharmaceutical Production Facilities with Cyclotrons' that will be published soon.
