

John Weisend is currently a Senior Scientist in the Accelerator Division at the European Spallation Source in Lund, Sweden. He is also an Adjunct Professor of Engineering at Lund University. He received his PhD in Nuclear Engineering & Engineering Physics from the University of Wisconsin — Madison. He has worked at the SSC Laboratory, the Centre D'Etudes Nucleaires Grenoble, the Deutsches Elektronen-Synchrotron Laboratory (DESY), the Stanford Linear Accelerator Laboratory (SLAC), the National Science Foundation and Michigan State University. Dr. Weisend's interests include He II, cryogenic safety, large scale accelerator cryogenics and the development of large international science projects. He is a Section Editor in Chief for the European Physical Journal — Techniques and Instrumentation. He is a member of both the Cryogenic Engineering Conference and International Cryogenic Engineering Conference Boards. His publications include *He is for Helium*, *Going for Cold* (co-authored with T. Meaden), *Cryogenic Safety* (co-authored with T. Peterson), *Cryogenic Two-Phase Flow* (co-authored with N. Filina)
