

Dr. Eduardo Alves is Full Researcher at Instituto Superior Técnico (IST), Universidade de Lisboa. He is member of the Board of Directors of Instituto de Plasmas e Fusão Nuclear where coordinates the Group of Materials Processing and Characterization using ion beam technologies. His scientific activity is focused on the study of charge particle interactions with solids with particular emphasis on radiation defects and doping processes in wide band gap materials and nanostructures. He co-authored over 750 publications in reference journals with a factor of 55 (ResearcherID P-5031-2019). Received the Award ""Estímulo à Excelência"" by the Foundation for Science and Technology (2004) and the Silver Medal of Scientific Merit from the Polytechnic Institute of Lisbon (2005).
