

Arjan Koning is the head of the IAEA Nuclear Data Section (NDS) since 2015. NDS develops and disseminates nuclear data to the IAEA member states for nuclear science and technological applications. Before that he was employed by NRG Petten, the Netherlands as programme manager of nuclear science. Since 2013, he is Associate professor University of Uppsala, Sweden on theoretical nuclear reactions. He holds a PhD in nuclear physics. Arjan has more than 30 years' experience in the computational modelling of nuclear reactions. He is the main developer of the TALYS nuclear reaction code and the TENDL nuclear data library. His publication output of about 400 papers currently leads to an h-index of 55 and about 18 000 citations.
