### **ABSTRACT**

Occupational radiation protection was assessed at the Tarkwa Gold mines in the Western Region of Ghana by measuring the radioactivity levels arising from Naturally Occurring Radioactive Materials (NORM) at the operational area of the mine in order to determine the level of exposure to workers. This was achieved by determining the activity concentration of natural radionuclides namely <sup>238</sup>U, <sup>232</sup>Th and <sup>40</sup>K in soil collected from the mine concession using gamma spectrometry. The average activity concentrations of <sup>238</sup>U, <sup>232</sup>Th and <sup>40</sup>K in the soil samples at the depths of 0-20 cm were found to be 7.25 ±1.03 Bqkg<sup>-1</sup>, 19.47±3.41 Bqkg<sup>-1</sup> and 176.98±8.86 Bqkg<sup>-1</sup> respectively, which were far below the exemption values of 1000 Bqkg<sup>-1</sup> for <sup>238</sup>U and <sup>232</sup>Th and 10,000 Bqkg<sup>-1</sup> for <sup>40</sup>K in materials that will warrant regulatory control.

In general, the results do not show significant levels of natural radionuclides in the mine. However, since the workers in the mine may be exposed over a long period of time which may result in bioaccumulation, it is recommended that they apply certain protective measures such as wearing appropriate PPEs to protect themselves from chronic exposures which may be detrimental to their health.

nyarkopatienc5@yahoo.com

### **Speakers affiliation**

Ghana Atomic Energy Commission

### **Name of Member State/Organization**

Ghana

**Primary authors:** Ms AGYEMAN, Bernice (Ghana Atomic Energy Commission); Mr ADJEI, Daniel Nii (Ghana Atomic Energy Commission); Dr KPEGLO, David Okoh (Ghana Atomic Energy Commission); SARFO, Patience (Ghana Atomic Energy Commission); Ms OFOSU SARFO, Evelyn (Ghana Atomic Energy Commission); Dr OTOO, Francis (Ghana Atomic Energy Commission); Mr ABUBAKAR, Maruf (Ghana Atomic Energy Commission); Dr ADUKPO, Oscar (Ghana Atomic Energy Commission)

**Presenter:** SARFO, Patience (Ghana Atomic Energy Commission)

**Session Classification:** Session 7. Occupational radiation protection in the workplaces involving exposure to naturally occurring radioactive material, radon, and cosmic rays

**Track Classification:** 5. Occupational radiation protection in the workplaces involving exposure to naturally occurring radioactive material, radon and cosmic rays
