

Plasma transient challenges (disruptions, detachment loss, equilibrium) and resulting requirements for the machine design of a DEMO tokamak reactor

Tuesday, 30 August 2022 10:35 (45 minutes)

Country or International Organisation

Affiliation

Primary author: MAVIGLIA, Francesco (EUROfusion)

Presenter: MAVIGLIA, Francesco (EUROfusion)

Session Classification: Tuesday, 30 August 2022

Track Classification: Topic 1: Transient operational phases and transient loading environments for fusion DEMO power plants: Plasma transient challenges (disruptions, detachment loss, equilibrium) and resulting requirements for the machine design of a DEMO tokamak reactor
