ANL-ND near-future (5-7 years) vision

- **Continue contributing to ENSDF - top priority since it is struggling** – expand contributions (fully-funded ANL senior staff and a new junior staff) & closer connections with ATLAS/CARIBU & FRIB research communities

- **Continue AME & NuBase collaboration activities**
  - maintain the currency (4-5 years cycle) and quality

- **Continue collaborations with IAEA-NDS, other USNDP groups & broader nuclear physics community on Nuclear Data *topical evaluations* – impact in high-priority areas**

- **Continue ND experimental activities** - nuclear structure, masses, astrophysics & intersections with the applied programs
  - **ATLAS & CARIBU:** emphasis on properties of neutron-rich nuclei in the deformed, light rare-earth region, heavy nuclei & nuclear isomers
    - **N=126 factory:** the region south of ^{208}Pb - overlaps with the ND evaluation responsibilities
    - **nuCARIBU:** contributions to ND FOA's and other InterAgency ND projects
  - **MSU (FRIB), RIKEN, GSI (ILIMA):** collaborative research at the forefront of nuclear science
