

2nd IAEA Technical Meeting on the Collisional-Radiative Properties of Tungsten and Hydrogen in Edge Plasma of Fusion Devices

Contribution ID: 88

Type: **Oral**

(withdrawn) Update on electron-H₂ and -D₂ cross sections

Wednesday, 29 November 2023 13:30 (30 minutes)

In this talk will be presented our last results on electron-H₂ and -D₂ collisions. We will focus in particular on the vibrational-excitation, dissociative-attachment, dissociative-recombination and dissociative-excitation processes rotationally and vibrationally resolved.
