

# Second Technical Meeting on Long-Pulse Operation of Fusion Devices

## Monday, 14 October 2024

### LPO session - Board Room D (14:30 - 15:40)

time	[id] title	presenter
14:30	[79] The new ITER Baseline research plan and long-pulse/steady-state operations in ITER	KIM, Sun Hee
15:05	[77] Recent Experimental Results on EAST in Support of ITER and CFETR SSO	HUANG, Juan

### LPO session - Board Room D (16:10 - 17:20)

time	[id] title	presenter
16:10	[80] Long pulse operation in a W environment : feedback from WEST	MANAS, Pierre
16:45	[65] Achievement of 102-second High-performance Long-pulse Discharge with Lower W-shaped Tungsten Divertor in KSTAR	Dr KIM, Hyun-Seok

# Tuesday, 15 October 2024

## LPO session - Board Room D (09:00 - 10:35)

time	[id] title	presenter
09:00	[73] Development of long pulse scenarios at the stellarator Wendelstein 7-X	KRYCHOWIAK, Maciej
09:35	[84] High density and high neutral particle pressure in the divertor for steady state operation in LHD	Dr MOTOJIMA, Gen
10:00	[64] High density as an avenue towards high confinement quality and core-edge integration in advanced tokamaks	DING, Siye

## LPO session - Board Room D (11:05 - 11:30)

time	[id] title	presenter
11:05	[67] Long pulse operation with the JET ITER-Like Wall	Dr LERCHE, Ernesto
