

Summary of the session
– Status and prospects of fusion magnet development in the world –

Nagato Yanagi^{1,2}

¹National Institute for Fusion Science, 322-6 Oroshi, Toki, Gifu 509-5292, Japan

²SOKENDAI (The Graduate University for Advanced Studies), 322-6 Oroshi, Toki, Gifu 509-5292, Japan

A summary of the session on the development of fusion magnets in the world is given from the seven talks and the overall discussion. The session covers the topics on “Development of LTS and HTS wires”, “Magnet development for national projects”, “Magnet development for public-private partnership”, “Test facilities”, and “Irradiation”. Highlights from the talks are reviewed, and the future prospects are discussed.
