

INTERNATIONAL ATOMIC ENERGY AGENCY

Guidelines for the Authors

- i. The synopsis (extended abstract) is the only material used by the PC for selection and should not exceed 1250 words (~2 pages), excluding references/acknowledgments
- ii. The evaluation criteria are Impact, Novelty and Quality.
- iii. A meaningful title that communicates the main achievements is helpful.
- iv. The synopsis should clearly emphasize how the work described meets the criteria. It is recommended that there is a clear focus on results obtained, conclusions and impact in the field.
- v. Results obtained should be described and clearly stated at the beginning to assist the evaluation. Note that the PC work is conducted under strict confidentiality agreement.
- vi. Methodology and motivational statements are important but should not dominate the content of the synopsis.
- vii. The use of 2-3 figures in the synopsis can be very helpful in clearly communicating principal results.
- viii. The synopsis for overview contributions should provide a coherent analysis of a specific subject area, clearly showing main cross references in the same FEC.
- ix. Plans to undertake future productive analysis are welcome but cannot substitute for evidence of completed work.
- x. Conference manuscripts and synopses are not peer reviewed publications and will be made available at the end as Conference Material.
