

endf-parserpy: A Python package for working with ENDF-6 files

Monday 11 November 2024 11:40 (40 minutes)

The handling of ENDF-6 files is often perceived as cumbersome, especially regarding their creation. The Python package *endf-parserpy* has been created with the objective of providing a handy tool to facilitate the interaction with ENDF-6 files. This contribution will present design considerations and capabilities of this package.
