

International shipment of category 1 sources under special arrangement

The proposed paper will present the uruguayan experience in the approval and execution of an international shipment under special arrangement. The shipment involved a multipurpose self-shielded modular irradiator with category 1 cobalt-60 sources. The paper will describe the stages of the shipment process for the reloading of the modular irradiator. It will also outline the provisions approved by the competent authorities involved and the bilateral coordination and cooperation between regulatory bodies.
