

EX/P2-41

DIII-D and RFX-mod achieved reproducible tokamak operation at $q_{95} < 2$ thanks to feedback control of 2/1 RWM - *for many resistive wall times*

I_p

q_{95}

2/1 RWM

Blue curve: with feedback control

Red curve: w/o feedback control

Paper: "Extreme low-edge safety factor tokamak scenarios via active control of three-dimensional magnetic field on RFX and DIII-D", by P. Martin et al., EX/P2-41
