

## Russian Support Experience to Strengthen Newcomer Countries Regulatory Infrastructure

*Thursday, 30 October 2014 12:30 (30 minutes)*

The Russian Federation implements an ambitious exporting program of Russian nuclear energy technologies including Russian design NPP construction all over the world, including the newcomer countries. According to international agreements and the best practices this leads to a necessity of providing a consistent nuclear regulatory infrastructure support, transfer of regulatory practice and experience, technical and scientific consulting, personnel training and wide set of services rendered by Russian TSOs.
