

International Conference on Challenges Faced by Technical and Scientific
Support Organizations (TSOs) in Enhancing Nuclear Safety and Security -
IAEA CN-214

Contribution ID: 36

Type: **Contributed**

The Impact of Fukushima Nuclear Accident to China's Mainland Environment

Monday, 27 October 2014 17:30 (30 minutes)

With the radiation monitoring results from the environmental protection agencies, the monitoring results of gamma dose rate, air, water and soil were systematically analyzed and summed up, and the general level of radiation quality during the accident was summarized in this paper.

Country or International Organisation

China

Primary authors: Mr ZHENG, Guodong (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP); Prof. WANG, Lei (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP); Ms XU, Minghui (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP); Ms KOU, Shujing (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP); Prof. ZHAO, Shunping (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP); Ms WANG, Xiaofen (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP);

Presenter: Mr ZHENG, Guodong (1.Radiation Monitoring Technical Center, MEP ; 2.State Key Laboratory of Radiation Environmental Monitoring, MEP);

Session Classification: Session 1: Poster Session

Track Classification: The role of TSOs in Relation to the Fukushima Daiichi Accident
