

Meera Venkatesh

Meera Venkatesh is currently serving as the Director, Division of Physical and Chemical Sciences at the Department of Nuclear Sciences and Applications, overseeing activities in nuclear sciences, radioisotope production and radiation technology applications.

In the past, Ms. Venkatesh worked at the Indian Atomic Research Organization, Bhabha Atomic Research Centre for 35 years, in the area of radioisotope production and their various applications, especially radiopharmaceuticals. The last ten years led the programmes on production, supply and applications of radioisotopes.

She won awards for the excellency in promoting nuclear applications from the Department of Atomic Energy (India) and Indian Nuclear Association. In her career, she published more than 200 research papers and presented more than 150 papers in conferences/symposia, guided 12 students in their work to get doctorate degrees in chemistry and applied biology. Ms. Venkatesh is also an honorary editor in 2 journals in the field of radiation and applications.
