

## Eileen Radde

Eileen Radde is the chair of the European Nuclear Society – Young Generation Network and works currently as an engineer at the Nuclear Engineering Seibersdorf, and is managing the interim storage of Austrian radioactive wastes. Before that she was employed by the IAEA and Westinghouse Electric Germany. She obtained her Master’s degree in Technical physics in 2011 from the University of Technology Graz and Vienna. Her main research and working fields are Nuclear Security, Safeguards as well as Waste and Decommissioning with a special interest in gamma spectroscopy. She has developed a Nuclear Security Master’s Programme in a EU funded project, which started in March 2013.

Together with several colleagues she published a book in 2011, which explains basic nuclear principles and various nuclear technologies in layman language (“Pinning down nuclear — To the core of the matter, Vienna 2011”).
