

International Conference on Human and Organizational Aspects of Assuring Nuclear Safety – Exploring 30 Years of Safety Culture

Contribution ID: 194

Type: **Dialogue Session**

Capturing Inputs and Requests to the IAEA and Introducing the New Developments in Harmonizing Safety Culture Frameworks

Thursday, 25 February 2016 15:45 (1h 15m)

Synopsis

This dialogue session invites conference participants to provide inputs and formulate requests to the IAEA in the working areas covered by the conference.

In addition, the IAEA project on harmonization of safety culture models will be introduced. While there are many models of safety culture, when examined at their most detailed level, there is much commonality across the models. Because of this, the IAEA has started a project to develop a model of safety culture that incorporates the important elements of these models. During this session the audience will be updated on the status of the project and the plans for 2016.

Co-author: KOVES, Ken (INPO)

Presenters: SKARBO, Birgitte (IAEA); RYCRAFT, Helen (IAEA); KOVES, Ken (INPO)

Session Classification: Dialogue Session
