

Third International Conference on Nuclear Knowledge Management - Challenges and Approaches

Contribution ID: 161

Type: oral

The European Nuclear Education Network: Towards Harmonisation of Education, Training, and Transfer of Knowledge

Thursday, 10 November 2016 14:15 (15 minutes)

The European Nuclear Education Network (ENEN) Association strives to develop a more harmonized approach for education in the nuclear sciences and nuclear engineering in Europe and to integrate European education and training in nuclear safety and radiation protection. Improved co-operation and sharing of academic resources and capabilities at the national and international level is an important long-term objective. With respect to stakeholders, such as nuclear industries, research centers, regulatory bodies and other nuclear infrastructures, the primary objectives of ENEN are to create a secure basis of skills and knowledge of value to the EU, and to maintain a high-quality supply of qualified human resources for design, construction, operation and maintenance of nuclear infrastructures, industries and power plants. ENEN supports activities aimed at maintaining the necessary competence and expertise for the continued safe use of nuclear energy and applications of radiation and nuclear techniques in agriculture, industry and medicine. In this technical brief we describe selected activities pursued to reach these goals.

Country or International Organization

ENEN

Primary author: Mr TUOMISTO, Filip (Aalto University)

Co-authors: Mr CIZELJ, Leon (Jozef Stefan Institute, Ljubljana, Slovenia); Mr DIEGUEZ PORRAS, Pedro (ENEN)

Presenter: Mr TUOMISTO, Filip (Aalto University)

Session Classification: Technical Session 18

Track Classification: Track 1: Strategic and cross-cutting KM issues in organizations
