

Third International Conference on Nuclear Knowledge Management - Challenges and Approaches

Contribution ID: 30

Type: **poster**

Experience and Know-how Sharing Project at KAERI

Monday, 7 November 2016 17:00 (1 hour)

With its long history of over 50 years, KAERI (Korea Atomic Energy Research Institute) has produced a large amount of information and explicit knowledge such as experiment data, database, design data, report, instructions, and operation data at each stage of its research and development process as it has performed various researches since its establishment. Also, a lot of tacit knowledge has been produced both knowingly and unknowingly based on the experience of researchers who have participated in many projects. However, in the research environment in Korea where they focus overly on the output, tacit knowledge has not been managed properly compared to explicit knowledge. This tacit knowledge is an asset as important as explicit knowledge for an effective research and development. Moreover, as the first generation of atomic energy and research manpower retire, their accumulated experience and knowledge are in danger of disappearing. Therefore, in this study, we sought how to take a whole view and to document atomic energy technology researched and developed by KAERI, from the background to achievement of each field of the technology.

Country or International Organization

Republic of Korea

Primary author: Mr LEE, Heewon (Korea Atomic Energy Research Institute)

Co-authors: Mr OH, Jeonghoon (Korea Atomic Energy Research Institute(KAERI)); Ms LEE, Yoojin (Korea Atomic Energy Research Institute(KAERI))

Presenter: Mr LEE, Heewon (Korea Atomic Energy Research Institute)

Session Classification: Poster Session

Track Classification: Track 7: KM in nuclear technology research, development and innovation
