

Third International Conference on Nuclear Knowledge Management - Challenges and Approaches

Contribution ID: 156

Type: **oral**

Education and Training Activities of the SCK•CEN Academy for Nuclear Science and Technology

Tuesday, 8 November 2016 14:00 (15 minutes)

In 2012, The Belgian Nuclear Research Centre SCK•CEN officially launched its “Academy for Nuclear Science and Technology”. Thanks to its thorough experience in the field of nuclear science and technology, its innovative research and the availability of large and unique nuclear facilities, SCK•CEN is not only a renowned nuclear research institution, but also an important partner for nuclear education and training in Belgium as well as at international level.

Within the SCK•CEN Academy, more than 60 years of nuclear expertise and experience gained from our different research projects is collected and transferred. In order to maintain and extend a competent workforce in nuclear industry, healthcare, research, and governmental organizations, and to transfer this nuclear knowledge to the next generations, the mission of the SCK•CEN Academy comprises 4 main tasks: (i) providing guidance to young scientists, (ii) organizing of courses, (iii) providing policy support and (iv) caring for critical-intellectual capacities.

Country or International Organization

Belgium

Primary author: Ms COECK, Michèle (SCK•CEN)

Co-authors: Ms KESTELOOT, Nele (SCK•CEN); Mr CLARIJS, Tom (SCK•CEN)

Presenter: Ms COECK, Michèle (SCK•CEN)

Session Classification: Technical Session 6

Track Classification: Track 7: KM in nuclear technology research, development and innovation
