

Third International Conference on Nuclear Knowledge Management - Challenges and Approaches

Contribution ID: 234

Type: **oral**

French Experience in the Area of Knowledge Management for New Nuclear Projects

Wednesday, 9 November 2016 09:30 (15 minutes)

Capturing knowledge from the beginning of the project is essential, as well as keeping it available, updated, and preserved for the benefit of the different generations of workers that will operate the facilities. This presentation exposes the French experience in the area of knowledge management throughout the lifecycle of a nuclear project. Organisations, processes and tools implemented by EDF will be illustrated in the presentation.

Country or International Organization
