Laying the Foundations for a Knowledge Management Strategy in the Context of a Nuclear New-Build Project

Wednesday, 9 November 2016 14:00 (15 minutes)

This paper outlines NuGen's strategic framework for Knowledge Management that is currently being defined in support of the Moorside nuclear new build project in the United Kingdom. The strategic context is described along with an underpinning KM model, five step knowledge process, and oversight and governance arrangements that in combination seek to deliver integrated and sustainable management of critical knowledge assets throughout the plant's lifecycle.
