
INDICO affiliations shortcuts for FEC-2016

Affiliations are traditionally a very time consuming part of entering author data into Indico, and extracting the data to make the conference Book of Abstracts. Based on past FEC conferences, the following tables have been created, organized by country, offering short symbolic names for the most common affiliations. For example, someone coming from the IRFU of the CEA in Saclay, France, need only enter the name “FrCEAIRFU” as affiliation in Indico. Please use these names where ever possible, it will save confusion in the long run (for example, during FEC-2014, “CnSWIP”, the Southwestern Institute of Physics, Chengdu, was entered with more than 34 different variant spellings).

If your affiliation is *not* in this list, please enter your affiliation in the *same style* as the affiliations shown here. That is to say, the information needs to be clear enough that a postal courier could get a package to you.

If your affiliation is only a small change to an existing affiliation here, (say, additional department clarification of an existing university, etc), then as affiliation, add the department followed by the existing code: e.g., “Department of Physics, JpUGunma”, for someone requiring the affiliation “Department of Physics, Gunma University, Maebashi, Gunma, Japan”
