

Small Specimen Test Technology Development Towards Design of Fusion DEMO Reactors and Future Direction Plan

E. Wakai (JAEA),

S. Nogami (Tohoku Univ.), Y. Ito (JAEA, GIC), A. Kimura (Kyoto Univ), H. Tanigawa, M. Sugimoto, M. Ando (QST),
A. Hasegawa (Tohoku Univ.), A. Nishimura (NIFS), R. Kasada (Kyoto Univ), M. Saito (Hachinohe Institute of Technology),
F. Arbeiter (KIT), K. Kondo (QST), J. Knaster (IFMIF/EVEDA Project Team), S.M. Gonzalez de Vicente (IAEA)

Ex.: Standard Size Specimen and Small Size Specimens In Fatigue Case

- Small specimen test technology (SSTT) and present issues of the test methodology were evaluated and discussed in IFMIF/EVEDA project.
- IAEA SSTT standardization activity will be started from 2017.
